## DETAILED ACTION

### *Election/Restrictions*

1. Applicant's election of Group III, claims 27-32 and 63-85 in the reply filed on October 5, 2005 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).
2. Claims 1-10, 14-20 and 33-51 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on October 5, 2005. Applicant previously cancelled claims 11-13, 22-26 and 52-62.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 27-32, drawn to a computer readable medium for fulfilling an order, classified in class 711, subclass 100.
  - II. Claims 63-67, drawn to a computer readable medium for supplying a consumer computer connected to an internetwork of computers, classified in class 711, subclass 100.
  - III. Claims 68-81, drawn to a computer readable medium for ordering a product, classified in class 711, subclass 100.
  - IV. Claims 82-83, drawn to a computer readable medium for processing an order for a product, classified in class 711, subclass 100.

The inventions are distinct, each from the other because of the following reasons:

4. Inventions Group I and Groups II-IV are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention Group I has separate utility such as a computer-readable medium used for executing confirmation of sales orders from a point-of-sale device. See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II, III or IV, restriction for examination purposes as indicated is proper.
6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
7. A telephone call was made to Gary S. Kindness (Reg. No. 22,178) on December 21, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
